

Playable Ad Brief: Roguelite Game

Project Name: Explottens-RogueArcade

Sequence Overview

The playable ad is designed to take the player through a fast, engaging roguelite loop showing attacks, upgrades, evolution mechanics, and a satisfying win state.

1. Intro:

Goal: Immediately grab attention with visual chaos and simple interaction.

Scene:

Player spawns in a small arena with incoming enemies and loot boxes.

Text overlay: "Survive, Upgrade, Evolve!"

Tutorial cue: small finger tap animation on player character to indicate movement.

Player Interaction:

Swipe to move and dodge incoming enemies.

2. Combat Loop:

Goal: Show core gameplay mechanics and attract core roguelite fans.

Scene:

Player fights a small wave of enemies using default attack.

Health bar visible; gem drops on enemy defeat.

Small UI panel shows: Attack → Loot → Upgrade

Player Interaction:

Auto-attack

Collect gems to power up

Visual / Audio Cues:

Standard attack SFX (light slash or bullet)

Loot box/Crate sparkle animation

Editable Elements:

7. Win (Reward and CTA)

Goal: End the playable ad with a strong reward feeling and CTA.

Scene:

Wave cleared, mini-boss defeated.

Text overlay: "Victory! Your hero is unstoppable!"

Confetti / particle effects (colorful)

End card: App logo + CTA "PLAY NOW"

Optional: In-game victory sequence

Visual / Audio Cues:

Victory SFX (cheers, fanfare)

Green "WIN" stamp or badge

Editable Elements:

CTA text and color

Background theme

Additional Notes:

1. Gameplay is time-sensitive: optional timer to create urgency (last 3 seconds blinking red + dramatic SFX).
2. Respect core game visual language: attack highlights, loot sparkle, particle effects, evo glow.
3. Playable should be exportable for Applovin, Unity, Moloco, Meta.
4. Tutorial cues should disappear once action is completed (cursor & text fade).
5. Evo weapon upgrades happen in the same level, no scene change.
